Acclaimed Business Coach Teaches “Fortune Creation” With Tarot

When people think of Tarot, they often think of snaggle-toothed fortune tellers making dire predictions in movies and on TV shows. But business strategist and Tarot pioneer James Wanless, PhD, says that in the 21st century, Tarot is all about fortune *creation* – creating the life you want and making your dreams come true.

“When people ask me to tell them their future, I put the questions back to them: What do you really want to create with your future? What do you desire in your life?” says Wanless. “Then I use the cards to show them how to get there.”

Wanless uses his bestselling *Voyager Tarot* to teach innovation, problem-solving, and strategic intuition to corporations around the globe. He reveals his secrets of manifestation in “Tarot Into The Light,” the first release in *21st Century Tarot*, a new DVD series from Tarot Media Company.

Wanless demonstrates how a simple 4-step technique called “The Manifestation Mantra” and the 4 aces in an ordinary pack of Tarot cards can be used to create anything.

Step 1: “See It” – You must be able to visualize clearly what you want to create

Step 2: “Feel It” – Feel as if what you desire has manifested already

Step 3: “Believe It” – Belief that it is possible is crucial to making it happen

Step 4: “Do It” – Take action towards your goal

“Many of the bestselling books right now are about manifestation,” says Wanless. “Everyone wants to know how to make things happen in their lives! But it’s not complicated. When you see it, feel it, believe it, and do it... it happens.”

“The Tarot is the ideal tool for making things happen,” he says.

“There hasn’t been much discussion about where and how Tarot fits in to this era,” says Tarot Media Company Executive Director Anastasia Haysler, who joins Wanless in conversation on the DVD. “When used for personal insight, healing and manifestation, Tarot can help people in the 21st Century take control of their lives.”
